How we help:

step by step safety & compliance

Everybody wants to prevent fatal falls but getting height safety right is anything but straightforward. The intricacies of compliance with height safety codes, standards and regulations leave most organisations wondering just what needs to be done.

Workplace Access & Safety's role is to make it all manageable and keep your people safe. Our practical, commercial solutions take away the worry, frustration and risk associated with working at heights.

We'll make your sites and systems safe and compliant, step by step.

Who we are:

the height safety specialists

Workplace Access & Safety was established in 1997 to help workplaces meet their obligations under working at heights legislation.

We were appalled to find that while falls injuries remained one of the top causes of workplace fatalities, so many workplaces were being sold unsuitable equipment. Expensive equipment that required special skills to use, that often introduced new risks, demanded extra administration and didn't necessarily comply with the OHS legislation.

Instead, our solutions match the people, the infrastructure and the applications of each site. This holistic approach genuinely reduces risk and complies with legislation.

Offering a unique blend of both theoretical and practical experience, Workplace Access & Safety has established itself throughout Australia as the leading authority in the provision of OHS risk management and compliance support for working at heights.

01 consultancy
02 design
03 inspections
04 installation
05 training

What we offer:

from advice to installation

Workplace Access and Safety provides the full safety package for fall prevention – from risk assessments and system design through to installation, training, annual maintenance and certification.

Site assessments

Fall prevention risk assessments, consulting, audits and budgeting.

Design

Equipment design, specification and scope of works.

Fabrication

Workplace Access & Safety's factories in Sydney, Melbourne, Brisbane and Adelaide build the equipment specifically for your sites.

Specification development

Documentation of suitable controls for your sites.

Construction

On-site installation of equipment at your sites, wherever they may be. We install in every state in Australia and travel internationally for clients seeking consistency.

Testing, inspection and certification

Systems need to be inspected and tested regularly. Workplace Access & Safety does all the administration and work for you.

Documentation

We help clients develop work method statements, systems of work, permit system, access and rescue procedures that compliment the equipment on their sites.

Training

We offer height safety training for managers, or practical skills for tradespeople. Workplace Access & Safety is a Registered Training Organisation (RTO) and can deliver accredited training.

Incident investigation

To establish the root cause of serious incidents and near misses, to make sure that they aren't repeated.

Expert witnesses

Workplace Access & Safety acts as expert witnesses for leading defence lawyers.

What they say about us

customer testimonials

“Workplace Access & Safety are very professional and their workmanship is good. I’d use them again without a doubt. When I asked for service they were prompt, professional and flexible. They met our demands and needs completely. The whole company is good to deal with and everyone was helpful.”

- K. Andrews, Project Co-ordinator, H.J. Heinz Co. Australia Ltd.

“Workplace Access & Safety deliver what they say they’re going to deliver. Their workmanship is good and they are responsive to our needs. Their reporting and quotes are far superior to anything else we receive.”

- R Tini, Maintenance Manager, Coles Supermarket

“Workplace Access & Safety are prepared to work with me to find a solution. They seem to have many representatives who understand our requirements and can respond accordingly. They have a good understanding of safety requirements for working at heights, have a good product range and are personable.”

- N. Bright, National Facilities Manager, Office Work Superstores Pty Ltd

“We used Workplace Access & Safety because they offer value for money, have a good safety record, provide appropriate quality and are able to deliver on time.”

- M. Filby, Team Leader for Project Managers, Melbourne Water
