

# Air-conditioning Platforms

# DEFENDER™

Independently certified safety

## Defender™ air-conditioning platforms

Access HVAC systems and mechanical plant in real safety with Defender's air-conditioning platforms.

Defender is designed and independently certified to ensure compliance with **Australian Standards, Australia's National Construction Code** (formerly the BCA), **OHS legislation** and **state law**.

All Defender air-conditioning platforms are installed by Certified Defender Installers, ensuring the highest standards in quality, reliability and compliance with safety requirements.

## Defender air-conditioning platforms are:

- > CodeMark™ approved to comply with Australia's National Construction Code (formerly the BCA)
- > ISO 9001 StandardsMark™ Five-tick Quality Certified
- > R10 slip resistance – independently tested in a NATA™ -accredited laboratory to meet the outdoor walkway slip-rating of R10 on a wet oil ramp test
- > Fully compliant to Australian Standard AS 1657
- > Fully compliant with OHS legislation
- > Strong, reliable and built to last
- > Custom built to meet your site requirements
- > Easy to install on existing sites where space constraints make access for bulky structures difficult
- > Can be carried up stairwells in component form, saving on use of crane lifts
- > Made from non-corrosive aluminium. All metal components are hot-dipped galvanised
- > Installed by Certified Defender™ Installers
- > Extraordinarily cost-effective

## Defender™ ... independently certified safety

The Defender differences add up to air conditioning platforms that are the simplest and safest way to access HVAC systems and mechanical plant. But don't just take our word for it: Defender brings the assurance of independently certified safety.

Carrying **StandardsMark™ certification**, Defender access and safety equipment is designed by engineers, tested in a **NATA™-accredited** facility and installed by Certified Defender Installers.

Defender HVAC platforms fully comply with **National Construction Code, AS 1657, OHS legislation** and **state law**.

Most importantly, every Defender air-conditioning platform is individually built to suit your site, HVAC system, and the way your people work.

## Defender HVAC platforms are designed and tested for optimal performance

- > Custom-built incorporating existing structure
- > The complete solution: your Defender HVAC platform is matched with a full suite of safety equipment (guardrails, hand-rails, cages, fixed ladders, intermediate platforms, lockable gates, access hatches, stabilizing brackets, etc.)
- > Manufactured in an independently ISO 9001 accredited facility to ensure consistently high quality
- > Manufactured from non-corrosive aluminium
- > All steel components are hot-dipped galvanised
- > Stringently tested for weight and strength
- > Sturdy and highly durable
- > Installed with complete safety fittings
- > Installed by Certified *Defender™* Installers

## Other **DEFENDER** safety products in the series:

- |                         |                             |
|-------------------------|-----------------------------|
| Access Hatches          | Rung Ladders                |
| Cooling Tower Platforms | Staircases                  |
| Guardrails              | Static Lines & Rail Systems |
| Landings & Platforms    | Step Type Ladders           |
| Roof Anchors            | Walkways                    |

## Australian Standards Committee Participation

Defender's manufacturer, Workplace Access & Safety, is a proud participant in the Australian Standards Committee, contributing technical expertise to the development of Australian Standard AS 1657.

AS 1657 is the Australian Standard for the design, construction and installation of fixed platforms, walkways, stairways and ladders. This standard underpins Defender's performance.

## ISO 9001 Quality

ISO 9001 is the world's most established quality framework, currently being used by over 750,000 organisations in 161 countries. This standard assures Defender's quality.

## NATA™ Accredited Testing

NATA is the authority that provides independent assurance of technical competence through a proven network of best practice industry experts. The criteria for determining a facility's competence are based on the relevant international standard (e.g. ISO/IEC 17025, ISO 15189, ISO/IEC 17020). NATA provides assessment, accreditation and training services to laboratories and technical facilities throughout Australia and internationally.

## CodeMark™ - National Construction Code Approved

The CodeMark scheme assures you of compliance with Australia's National Construction Code (formerly the BCA).

*Get it done right, first time, for less. Defender equipment and installation is extraordinarily cost-effective. Why? Because smart design shouldn't cost extra.*
