

Access Hatches

DEFENDER™

Independently certified safety

Defender™ access hatches

Defender access hatches are the safe and user-friendly way to access roofs, platforms and equipment.

They are designed to ensure full compliance with **Australian Standards**, **OHS legislation** and **state regulations**.

All Defender access hatches are installed by Certified Defender Installers for consistent quality and compliance with safety standards.

Easy to open single-handedly, maintenance-free and secure, each Defender roof access hatch boasts:

- > Manufactured in an independently-accredited ISO 9001 facility to ensure consistently high quality
- > Defender grabrails and guardrails, designed and tested in a **NATA™** - (National Association of Testing Authorities) **accredited** facility for full compliance to AS 1657 and Australia's National Construction Code.
- > Easy-open 'one hand' mechanism for users on a ladder
 - Locks easily incorporated into existing alarm systems and keying
 - Robust and trafficable insulated zinc/aluminium coated steel outer lid
 - Sliding hatches that won't slam shut in the wind eliminate maintenance associated with gas struts
 - Standard sizes in stock for rapid delivery
- > Strong, reliable and built to last
- > Custom built to meet your site's requirements
- > Optional painting/powder coating to match your site's aesthetics
- > Installed with complete safety fittings
- > Extraordinarily cost-effective
- > Installed by Certified **Defender™** Installers with plumbing and watertight system guarantees

Defender™ ... independently certified safety

The Defender differences add up to remarkably robust access hatches that are easier and safer to use. But don't just take our word for it: Defender brings the assurance of independently certified safety.

Defender access hatch systems fully comply with **Australian Standards, OHS legislation** and **state regulations**.

Most importantly, every Defender access hatch is configured to suit your site and the way your people work. The result is strong, reliable equipment that delivers fully compliant access and true safety.

No leaks

Hatches are fitted by Certified Defender™ Installers to ensure they are watertight.

Match with hand grabrails and guardrails for safety

Hand grabrails incorporated into the guardrails around each hatch make it easier and safer to move between the hatch and the roof. With that added safety, for users transitioning from one level to another, comes a barrier to prevent falls by those on the roof into the void of an open hatch. All Defender grabrails and guardrails carry **StandardsMark™** certification, assuring full compliance to **AS 1657**.

7-year warranty

Defender access hatches are incredibly tough. So tough, we back them with a 7-year metropolitan on-site warranty.

Quick delivery, minimal disruption

For rapid delivery, Defender access hatches are stocked in our warehouse in kit form to suit all standard roof and platform profiles. Your Defender access hatch can be installed with minimal disruption.

Cooling Tower Platforms	Staircases
Guardrails	Static Lines & Rail Systems
Landings & Platforms	Step Type Ladders
Roof Anchors	Walkways
Rung Ladders	Internal & Suspended Walkways

AS 1657 Approved Guardrails

AS 1657 is the Australian Standard for the design, construction and installation of fixed platforms, guardrailing, walkways, staircases and ladders. This standard underpins the performance of Defender grabrails and guardrails.

ISO 9001 Quality

ISO 9001 is the world's most established quality framework, currently being used by over 750,000 organisations in 161 countries. This standard assures the quality of Defender Access Hatches.

NATA™ Accredited Testing of Guardrails

Defender grabrails and guardrails are rigorously testing in a NATA-accredited laboratory. NATA is the authority that provides independent assurance of technical competence through a proven network of best practice industry experts. The criteria for determining a facility's competence are based on the relevant international standard (e.g. ISO/IEC 17025, ISO 15189, ISO/IEC 17020). NATA provides assessment, accreditation and training services to laboratories and technical facilities throughout Australia and internationally.

CodeMark™ - National Construction Code Approved Guardrails

The CodeMark scheme assures you of compliance with Australia's National Construction Code (formerly the BCA) and is awarded to Defender's grabrails and guardrails.

Get it done right, first time, for less. Defender equipment and installation is extraordinarily cost-effective. Why? Because smart design shouldn't cost extra.
