

Landings & Platforms

DEFENDER™

Independently certified safety

Defender™ landings & platforms

Defender landings & platforms make climbing a long ladder, especially with tools or materials, safe and manageable.

Defender landings are expertly configured to:

- Offer a place to rest during a demanding climb
- Provide an area for tools and equipment

Landings & platforms also allow long ladders to comply with AS 1657, which states that landings must be no more than 6 metres apart.

All Defender landings & platforms are installed by Certified Defender Installers, ensuring the highest standards in quality, reliability and compliance with safety requirements.

Defender landings & platforms are designed and independently certified to ensure compliance with **Australian Standards, Australia's National Construction Code** (formerly the **BCA**), **OHS legislation** and **state law**.

All Defender landings & platforms are installed by Certified Defender Installers, ensuring the highest standards in quality, reliability and compliance with safety requirements.

Defender landings & platforms are:

- > CodeMark™ approved to comply with Australia's National Construction Code (formerly the BCA)
- > Tested in a NATA™-accredited (National Association of Testing Authorities) facility
- > R10 slip resistance- independently tested in a NATA™ laboratory to meet the outdoor walkway slip-rating of R10 on a wet oil ramp test
- > ISO 9001 Five-tick Quality Certified
- > Fully compliant to Australian Standard AS 1657
- > Fully compliant with OHS legislation
- > Strong, reliable and built to last
- > Custom built to meet your site requirements
- > Easy to install on existing sites where access can be a problem (steel is very difficult to get in)
- > Extraordinarily cost-effective
- > Made from non-corrosive aluminium. All metal components are hot-dipped galvanised
- > Installed by Certified Defender™ Installers

Defender™ ... independently certified safety

Defender landings & platforms make climbing a long ladder, especially with tools or materials, safe and manageable.

Defender landings & platforms are expertly configured to:

- Offer a place to rest during a demanding climb
- Provide an area for tools and equipment

The Defender differences add up to remarkably robust landings & platforms that are easier and safer to use. But don't just take our word for it: Defender brings the assurance of independently certified safety.

Carrying the **StandardsMark™ certification**, Defender access and safety equipment is designed by engineers, tested in a **NATA™-accredited** facility and installed by factory certified safety.

Defender landings & platforms fully comply with the **National Construction Code, AS 1657, OHS legislation** and **state law**.

Most importantly, every Defender landing & platform is individually built to suit your site and the way your people work.

Defender landings & platforms are designed and tested for optimal performance

- > Custom-built incorporating existing structure
- > The complete solution: your Defender landing & platform is matched with a full suite of safety equipment (guardrails, hand-rails, cages, fixed ladders, lockable gates, access hatches, stabilizing brackets, etc.)
- > Manufactured in an independently ISO 9001 accredited facility to ensure consistently high quality
- > R10 slip resistance – independently tested in a NATA™ laboratory (No. 2735) to meet the outdoor walkway slip rating of R10 on a wet oil ramp test
- > Manufactured from non-corrosive aluminium
- > Stringently tested for weight and strength
- > Sturdy and highly durable and certified by a structural engineer
- > Optional painting/powder coating to match your site's aesthetics
- > Installed with complete safety fittings
- > Installed by Certified Defender™ Installers

Other **DEFENDER** safety products in the series:

Access Hatches	Staircases
Cooling Tower Platforms	Static Lines & Rail Systems
Guardrails	Step Type Ladders
Roof Anchors	Walkways
Rung Ladders	Internal & Suspended Walkways

AS 1657 Approved

AS 1657 is the Australian Standard for the design, construction and installation of fixed platforms, walkways, stairways and ladders. This standard underpins Defender's performance.

ISO 9001 Quality

ISO 9001 is the world's most established quality framework, currently being used by over 750,000 organisations in 161 countries. This standard assures Defender's quality.

NATA™ Accredited Testing

NATA is the authority that provides independent assurance of technical competence through a proven network of best practice industry experts. The criteria for determining a facility's competence are based on the relevant international standard (e.g. ISO/IEC 17025, ISO 15189, ISO/IEC 17020). NATA provides assessment, accreditation and training services to laboratories and technical facilities throughout Australia and internationally.

CodeMark™ - National Construction Code Approved

The CodeMark scheme assures you of compliance with Australia's National Construction Code (formerly the BCA).

Get it done right, first time, for less. Defender equipment and installation is extraordinarily cost-effective. Why? Because smart design shouldn't cost extra.
