

Staircases

DEFENDER™

Independently certified safety

Defender™ staircases

Defender staircases are the safe and reliable choice for accessing roofs, platforms and equipment.

They are designed and independently certified to fully meet the requirements of Australia's **National Construction Code** (formerly the **BCA**) and **AS 1657**, ensuring compliance with **Australian Standards**, **OHS legislation** and **state law**.

All Defender staircases are installed by Certified Defender Installers for consistent quality and safety compliance.

Defender staircases are:

- > Strong, reliable and built to last
- > Custom built to meet your site's requirements
- > Installed by Certified *Defender™* Installers
- > Extraordinarily cost-effective
- > *StandardsMark™* approved to AS 1657
- > *CodeMark™* approved to comply with Australia's National Construction Code
- > Tested for slip resistance in a *NATA™* - (National Association of Testing Authorities) accredited fall prevention laboratory

Defender™ ... independently certified safety

The Defender differences add up to staircases that are remarkably robust, easy and safe to use. But don't just take our word for it: Defender brings the assurance of independently certified safety.

Carrying **StandardsMark™ product certification**, Defender access and safety equipment is designed by engineers, tested in a **NATA™-accredited** facility and installed by Certified Defender Installers.

Defender staircases fully comply with the **National Construction Code, AS 1657, OHS legislation and state law.**

Most importantly, every Defender staircase is individually built to suit your site and the way your people work.

Quick delivery, minimal disruption

For rapid delivery, Defender staircases are stocked in our warehouse in kit form to suit mezzanines, rooftops and any other changes in level. No welding or grinding is needed on-site so your Defender staircase can be installed with minimal disruption.

Defender Staircases are designed and tested for optimal performance

- > Manufactured in an independently-accredited *StandardsMark™* facility to ensure consistently high quality
- > R10 slip resistance – steps and treads are tested in a *NATA™*-accredited laboratory to meet the outdoor walkway slip-rating of R10 on a wet oil ramp test
- > Manufactured from non-corrosive aluminium
- > All steel components are hot-dipped galvanised
- > Stringently tested for weight and strength
- > Sturdy and highly durable
- > Rapid installation with minimal site disruption
- > Optional painting/powder coating to match your site's aesthetics
- > Installed with complete safety fittings
- > Installed by Certified *Defender™* Installers

Roof Anchors

Rung Ladders

Static Lines & Rail Systems

Step Type Ladders

Walkways

Internal & Suspended Walkways

AS 1657 Approved

AS 1657 is the Australian Standard for the design, construction, and installation of fixed platforms, walkways, staircases and ladders. This standard underpins Defender's performance.

ISO 9001 Quality

ISO 9001 is the world's most established quality framework, currently being used by over 750,000 organisations in 161 countries. This standard assures Defender's quality.

NATA™ Accredited Testing

NATA is the authority that provides independent assurance of technical competence through a proven network of best practice industry experts. The criteria for determining a facility's competence are based on the relevant international standard (e.g. ISO/IEC 17025, ISO 15189, ISO/IEC 17020). NATA provides assessment, accreditation and training services to laboratories and technical facilities throughout Australia and internationally.

CodeMark™ - National Construction Code Approved

The CodeMark scheme assures you of compliance with Australia's National Construction Code (formerly the BCA).

Get it done right, first time, for less. Defender equipment and installation is extraordinarily cost-effective. Why? Because smart design shouldn't cost extra.
