

# Internal & Suspended Walkways

**DEFENDER™**  
Independently certified safety

## Defender™ internal & suspended walkways

Always ready for use and built to last, Defender walkways are the safe and reliable choice for ceiling spaces, in ceilings and other hard to access spaces.

They are designed and independently certified to fully meet the requirements of **Australia's National Construction Code** (formerly the BCA) and **AS 1657**, ensuring compliance with **Australian Standards**, **OHS legislation** and **state regulations**.

All Defender walkways are installed by Certified Defender Installers, ensuring the highest standards in quality, reliability and compliance to safety requirements. Walkways are the regulator's preferred control for the risk of falls\*.

## Defender™ internal & suspended walkways are:

- > Stringently tested for weight and strength, meeting requirements for kPa uniformly distributed live loading
- > Manufactured from non-corrosive Grade T6 aluminium and hot-dipped galvanised components
- > Mounted on independent structures
- > Can span up to 8 metres
- > Lightweight and can be integrated into existing structures
- > Installed with complete safety fittings (end bars, joiners, etc)
- > Defender walkways are generally much more cost-effective than other fall prevention systems and offer superior safety, meeting mandatory requirements
- > Manufactured in a **StandardsMark™** accredited facility to ensure consistently high quality
- > **CodeMark™** approved to comply with Australia's National Construction Code (formerly the BCA)
- > Advanced, multi-directional non-slip surface – tested in a **NATA™-accredited** laboratory to meet the slip-rating of R10 on a wet oil ramp test
- > Warehoused in kit form, ensuring rapid installation and the minimum of disruption to your site
- > Incredibly cost-effective to install into existing buildings
- > Provided with full guarantee and warranty
- > Fitted by Certified **Defender™** Installers, with specialised training, ensuring the system is installed safely.

- \*Prevention of falls in general construction 2008 (Compliance Code)
- Code of Practice – Prevention of Falls at Workplaces
- Model Code of Practice – Managing the Risk of Falls at Workplaces
- AS 1657-2013 (Fixed platforms, walkways, stairways and ladders - design, construction and installation)

## Defender™ ... independently certified safety

Accredited with **StandardsMark™** and **CodeMark™ quality certification**, Defender access and safety equipment is designed by engineers, tested in a specialised **NATA™ -accredited** facility and installed by Certified Defender Installers.

Most importantly, every Defender system is individually configured to suit your site and the way your people work. The result is strong, reliable equipment that delivers fully compliant access and height safety.

### Installation

All safety documentation is covered under our AS/NZS 4801 system, ensuring incident-free installation.

### Quick delivery, minimal disruption

For rapid delivery, Defender walkways are stocked in our warehouse in kit form to suit all standard roof and platform profiles. No welding or grinding is needed on-site so your Defender walkway can be installed with minimal disruption.

### AS 1657 Approved

AS 1657 is the Australian Standard for the design, construction and installation of fixed platforms, walkways, staircases and ladders. This standard underpins Defender's performance.

### ISO 9001 Quality

ISO 9001 is the world's most established quality framework, currently being used by over 750,000 organisations in 161 countries. This standard assures Defender's quality.

### NATA™ Accredited Testing

NATA is the authority that provides independent assurance of technical competence through a proven network of best practice industry experts. The criteria for determining a facility's competence are based on the relevant international standard (e.g. ISO/IEC 17025, ISO 15189, ISO/IEC 17020). NATA provides assessment, accreditation and training services to laboratories and technical facilities throughout Australia and internationally.

### CodeMark™ - National Construction Code Approved

The CodeMark scheme assures you of compliance with Australia's National Construction Code (formerly the BCA).

## Other **DEFENDER** safety products in the series:

- |                         |                             |
|-------------------------|-----------------------------|
| Access Hatches          | Rung Ladders                |
| Cooling Tower Platforms | Staircases                  |
| Guardrails              | Static Lines & Rail Systems |
| Landings & Platforms    | Step Type Ladders           |
| Roof Anchors            | Walkways                    |

*Get it done right, first time, for less. Defender equipment and installation is extraordinarily cost-effective. Why? Because smart design shouldn't cost extra.*
