

Walkways For Tiled Roofs

DEFENDER™

Independently certified safety

Defender™ walkways for tiled roofs

Defender walkways are the safe and reliable choice for accessing tiled roofs, higher levels, platforms and plant equipment.

They are designed and independently certified to fully meet the requirements of **Australia's National Construction Code** (formerly the BCA) and **AS 1657**, ensuring compliance with **Australian Standards**, **OHS legislation** and **state regulations**.

All Defender walkway systems are installed by Certified Defender Installers, ensuring the highest standards in quality, reliability and compliance to safety requirements.

Always ready for use and built to last, walkways are also the regulator's preferred control for the risk of falls.*

Full compliance and real safety

To provide safe and reliable support Defender walkways for tiled roofs are:

- > Manufactured in a **StandardsMark™** accredited facility to ensure consistently high quality
- > **CodeMark™** approved to comply with Australia's National Construction Code (formerly the BCA)
- > Advanced, multi-directional non-slip surface – independently tested in a **NATA™-accredited** laboratory to meet the slip-rating of R10 on a wet oil ramp test
- > Stringently tested for weight and strength, meeting requirements for kPa uniformly-distributed live-loading
- > Manufactured from non-corrosive Grade T6 aluminium and hot-dipped galvanised components
- > Installed with complete safety fittings (end bars, joiners, etc)
- > All penetrations are sealed with Decktite to prevent roof leaks and damage to roof tiles
- > Defender walkways are generally much more cost-effective than other fall prevention systems and offer superior safety, meeting mandatory requirements
- > Warehoused in kit form, ensuring rapid installation and the minimum of disruption to your site
- > Incredibly cost-effective to install into existing buildings
- > Provided with full guarantee and warranty
- > Installed by Certified **Defender™** Installers with specialised training, ensuring that the system is installed safely.

- *Prevention of falls in general construction 2008 (Compliance Code)
- Code of Practice – Prevention of Falls at Workplaces
- Model Code of Practice – Managing the Risk of Falls at Workplaces
- AS 1657-2013 (Fixed platforms, walkways, stairways and ladders - design, construction and installation)

Defender™ ... independently certified safety

Defender walkway systems are always ready, providing safe, swift and easy access to roof-top plant for personnel without any specialised height safety training.

Carrying **StandardsMark™** product certification, Defender access and safety equipment is designed by engineers, tested in a **NATA™-accredited** facility and installed by factory-trained installers.

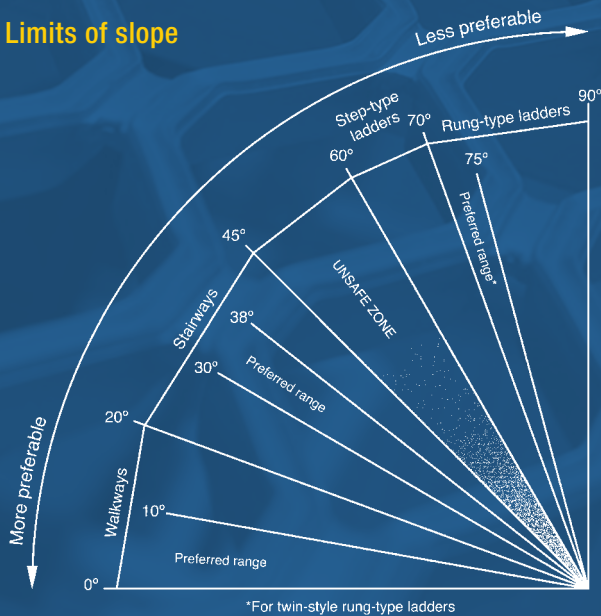

Defender walkways for tiled roofs fully comply with the **National Construction Code, AS 1657, OHS legislation** and **state regulations**.

Most importantly, every Defender walkway system is individually built to suit your site and the way your people work. The result is strong, reliable equipment that delivers fully compliant access and true safety.

About the AS 1657 Standard

The AS 1657 Standard requires that the means of access shall be selected from the following limits of slope, and considered in the hierarchical order given:

Limits of slope

Defender's wide range of equipment includes all the means of access discussed in AS 1657, in addition to all components (stabilising brackets, safety-lines, guardrails, hand-rails, cages, intermediate platforms, lockable gates, access hatches, etc.), for a complete and safe height access system.

Quick delivery, minimal disruption

For rapid delivery, Defender walkways are stocked in our warehouse in kit form to suit all standard roof and platform profiles. No welding or grinding is needed on-site so your Defender walkway can be installed with minimal disruption.

Installation

All safety documentation is covered under our AS/NZS 4801 system, ensuring incident-free installation.

AS 1657 Approved

AS 1657 is the Australian Standard for the design, construction and installation of fixed platforms, walkways, stairways and ladders. This standard underpins Defender's performance.

ISO 9001 Quality

ISO 9001 is the world's most established quality framework, currently being used by over 750,000 organisations in 161 countries. This standard assures Defender's quality.

NATA™ Accredited Testing

NATA is the authority that provides independent assurance of technical competence through a proven network of best practice industry experts. The criteria for determining a facility's competence are based on the relevant international standard (e.g. ISO/IEC 17025, ISO 15189, ISO/IEC 17020). NATA provides assessment, accreditation and training services to laboratories and technical facilities throughout Australia and internationally.

CodeMark™ - National Construction Code Approved

The CodeMark scheme assures you of compliance with Australia's National Construction Code (formerly the BCA).

Other **DEFENDER** safety products in the series:

- Access Hatches
- Cooling Tower Platforms
- Guardrails
- Landings & Platforms
- Roof Anchors
- Rung Ladders
- Staircases
- Static Lines & Rail Systems
- Step Type Ladders
- Walkways

Get it done right, first time, for less. Defender equipment and installation is extraordinarily cost-effective. Why? Because smart design shouldn't cost extra.
